**1. NATURE OF OPERATIONS AND BASIS OF PRESENTATION**

Camino Minerals Corporation (“Camino Minerals” or “the Company”) is an exploration stage company that is engaged directly in the exploration and development of mineral properties in Peru. The Company is incorporated and domiciled in British Columbia, Canada. The address of its registered and head office is 2300 – 1055 Dunsmuir Street, Vancouver, B.C., V7X 1L4.

**2. SIGNIFICANT ACCOUNTING POLICIES**

**a) Statement of Compliance**

These condensed consolidated interim financial statements have been prepared in accordance with IAS 34, *Interim Financial Reporting*, as issued by the International Accounting Standards Board. Accordingly, these condensed consolidated interim financial statements do not include all of the information and footnotes required by International Financial Reporting Standards (“IFRS”) for complete financial statements for year-end reporting purposes. These condensed consolidated interim financial statements should be read in conjunction as our annual consolidated financial statements for the year ended July 31, 2015 as they follow the same accounting policies under IFRS.

**b) Basis of Consolidation**

These consolidated financial statements include the accounts of the Company, and its wholly owned subsidiaries Minquest Peru SAC (“Minquest”) and Recursos Mineros Rojo S.A. de C.V. (“RMR”). All intercompany transactions and balances have been eliminated.

<b>Name of Subsidiary</b>	<b>Place of Incorporation</b>	<b>Proportion of Ownership Interest</b>	<b>Principal Activity</b>
Minquest Peru SAC	Peru	100%	Holds mineral interests in Peru
Recursos Mineros Rojo S.A. de C.V.	Mexico	100%	Holds Rodeo claim in Mexico

**2. SIGNIFICANT ACCOUNTING POLICIES (Cont'd)**

**c) Significant Accounting Estimates and Judgments**

The preparation of these condensed consolidated interim financial statements requires management to make certain estimates, judgments, and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and reported amounts of expenses during the reporting period. Actual outcomes could differ from these estimates. These condensed consolidated interim financial statements include estimates which, by their nature, are uncertain. The impact of such estimates is pervasive throughout the condensed consolidated interim financial statements, and may require accounting adjustments based on future occurrences. Revisions to accounting estimates are recognized in the period in which the estimate is revised and future periods if the revision affects both current and future periods. These estimates are based on historical experience, current and future economic conditions and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

**Critical accounting estimates**

Significant assumptions about the future and other sources of estimation uncertainty that management has made at the end of the reporting period relate to, but are not limited to, the following:

- i. *Impairment of Mineral Interests* - The assessment of impairment indicators involves the application of a number of significant judgments and estimates to certain variables including metal price trends, plans for properties and the results of exploration to date. In the year-ended July 30, 2014, the Company ceased exploration activities in Mexico and wrote down the carrying value of its mineral interests to \$1.

*New standards, amendments and interpretations adopted by the Company*

The Company has not yet adopted certain new standards, amendments and interpretations to existing standards, which have been published but are only effective for accounting periods beginning on or after July 1, 2015 or later periods.

- (i) Effective for annual periods beginning on or after January 1, 2018
  - New standard IFRS 9, *Financial Instruments, Classification and Measurement*, addresses classification and measurement of financial assets and will replace IAS 39, "*Financial Instruments: Recognition and Measurement*." IFRS 9 has two measurement categories: amortized cost and fair value. All equity instruments are measured at fair value. A debt instrument is at amortized cost only if the entity is holding it to collect contractual cash flows and the cash flows represent principal and interest. Otherwise, it is at fair value through profit and loss.

The Company plans to adopt these standards as soon as they become effective for the Company's. Adoption of this standard is expected to have minimal impact on the Company's financial statements.
