TSX Venture Symbol: COR

CAMINO MINERALS INCREASES THE RECENTLY ANNOUNCED FINANCING

Camino Minerals Corporation ("Camino" or the "Company") (COR: TSX-V) is pleased to announce that it has increased the size of the financing announced on May 2, 2017, and that it now intends to raise up to \$5,035,000 by way of a private placement, to fund the Phase 2 drill program at its Los Chapitos project ("Chapitos"), located in southern Peru.

The non-brokered private placement will consist of up to 5,300,000 units at a price of \$0.95 per unit for aggregate proceeds of up to \$5,035,000. Each unit will consist of one common share of the Company and one non-transferable share purchase warrant. Each warrant will entitle the holder to acquire one additional common share of the Company at a price of \$1.35 per common share for a period of 24 months after the closing date of the private placement. The warrants will be subject to an acceleration right in favor of the Company: should the closing price of the common shares of the Company on the TSX Venture Exchange be \$2.00 or higher for ten consecutive trading days, the Company will be entitled to accelerate the expiry of the warrants to the date that is 30 business days from the date of the issuance of a news release by the Company announcing the exercise of the acceleration right.

The securities issued under the offering will be subject to a hold period of four months and finders' fees may be payable in connection with the issuance of the securities. The private placement is subject to applicable regulatory approvals, including the approval of the TSX Venture Exchange.

Net proceeds of the private placement will be used to fund ongoing exploration, including the Phase 2 diamond drill program at the Chapitos Project and for general working capital.

The Phase 1 Reverse Circulation ("RC") drill program totaled five holes and focused on the Adriana Zone, one of several zones located along a 6 kilometer long trend on the eastern side of the property. All five RC holes intersected varying amounts of oxide copper mineralization. Holes CHR-002 and CHR-005 also intersected sulphide mineralization averaging 1.30% copper over 106 meters, including 2.12% copper over 38 meters, and 0.86% copper over 44 meters, including 1.85% copper over 16 meters, respectively. The RC drill program was suspended due to significant hole deviations and drill cutting returns averaging 70%. A diamond drill has been contracted to

complete the Phase 2 program and is scheduled to begin work in early May. This program is expected to include drilling a twin for hole CHR-002, and completing the initial test of the Katty Zone, which lies 1 kilometer east of the Adriana Zone. Assays will be release as they become available.

A summary presentation, including drill plans and sections, can be found on the company website at www.caminominerals.com.

Kenneth C. McNaughton, M.A.Sc., P.Eng., is the Qualified Person (QP) responsible for the Chapitos project.

About Camino Minerals Corporation

Camino is a discovery-oriented mineral exploration company. The Company is focused on the acquisition and development of high grade copper and precious metal projects. For more information, please refer to Camino's website at www.caminominerals.com

Cautionary Note Regarding Forward-Looking Statements and Information

This News Release contains "forward-looking information" and "forward looking statements" within the meaning of applicable Canadian and United States securities legislation. Statements contained herein that are not based on historical or current fact, including without limitation statements containing the words "anticipates," "believes," "may," "continues," "estimates," "expects," and "will" and words of similar import, constitute "forward-looking statements" within the meaning of the U.S. Private Securities Litigation Reform Act of 1995.

Forward-looking information may include, but is not limited to, information with respect to our planned exploration activities, the adequacy of our financial resources, the estimation of mineral reserves and resources, the results of future exploration and drilling. Wherever possible, words such as "plans", "expects", "projects", "assumes", "budget", "strategy", "scheduled", "estimates", "forecasts", "anticipates", "believes", "intends", "targets" and similar expressions or statements that certain actions, events or results "may", "could", "would", "might" or "will" be taken, occur or be achieved, or the negative forms of any of these terms and similar expressions, have been used to identify forward-looking statements and information.

Forward-looking information is subject to a variety of known and unknown risks, uncertainties and other factors that could cause actual events or results to differ from those expressed or

implied by the forward-looking information, including, without limitation, those risks identified in the Company's annual disclosure materials, filed with the securities regulatory authorities in Canada and available at www.sedar.com. Readers are encouraged to read these materials. Prospective investors should not place undue reliance on forward-looking information.

Neither the TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release.
